COMPTROLLER SEAN SCANLON UNVEILS 2026 COMPTROLLER'S HEALTHCARE CABINET REPORT

(HARTFORD, CT) – Comptroller Sean Scanlon today unveiled the [2026 Comptroller's Healthcare Cabinet Report](#), which includes ideas on restructuring current efforts and legislative proposals to promote healthcare equity and access in Connecticut.

Beginning in 2023, Comptroller Scanlon has brought together key policymakers, stakeholders, practitioners, and advocates at various roundtable events. Today's summit marked the third collective meeting of the Cabinet, which is composed of subcommittees tasked with creating bold, transformative solutions to healthcare obstacles facing key demographic groups throughout our state.

"The greatest threat to healthcare access in my lifetime is happening right now," **said Comptroller Scanlon**. "This report, the third from this Cabinet, is a roadmap for how we can accordingly protect and strengthen Connecticut's healthcare ecosystem. I am ready for this challenge, and so are the members of this Cabinet who collaborated on this report. This is a time of great risk but also of opportunity, and I hope we seize it on behalf of the people of this state who are both worried about losing care and fed up with the never-ending cost increases associated with it."

Following the report unveiling, the Office of the State Comptroller will continue its work with advocates and the Legislature to pursue these recommendations.
