

MUNICIPAL EMPLOYEES' RETIREMENT COMMISSION

RE: BENEFITS COMMITTEE

DATE: FEBRUARY 4, 2026

LOCATION: REMOTE VIA TEAMS

SPEAKERS AT MEETING:

Trustee Jeffrey Arn

Trustee Michelle Boyles

Trustee Michael Frieda

Trustee Troy Raccuia

**From the Office of the State Comptroller, Retirement
Services Division:**

Director John Herrington

Planning Specialist Benjamin Sedrowski

Associate Retirement and Benefits Officer Kari Pinoyer

Planning Specialist Megan Piwonski

PROCEEDINGS

(Recording begins)

MS. PIWONSKI: Good afternoon, everyone. The recording is now active. This is a meeting of the Benefits Committee of the Municipal Employees Retirement Commission. I am Megan Piwonski from the Retirement Services Division. The time is 2:03 and the meeting has been called to order. I will go ahead and call attendance. We have present for the meeting today. We have Trustee Jeffrey Arn, Trustee Michelle Boyles, Trustee Michael Frieda, Trustee Troy Raccaia. From the Office of the State Comptroller, Retirement Services Division Director John Herrington. Planning Specialist Benjamin Sedrowski. Associate Retirement and Benefits Officer Kari Pinoyer and myself, Planning Specialist Megan Piwonski. And so for this first meeting, we were hoping to go ahead and kick this off by hopefully picking a chair. So it looks like we have to do an approval of the agenda still, and -- is that correct?

MR. SEDROWSKI: Generally speaking, that's the normal framework, approval of the agenda and then go from there. I think one thing that we can also note, it might be helpful for the trustees, prior

1 to nominating and choosing the chair and the vice
2 chair, to discuss scope to a certain extent on the
3 Committee and what can be expected of that officer
4 role, so on and so forth.

5 MS. PIWONSKI: Okay, that makes sense. We do
6 assume that this group would meet four times a
7 year. This doesn't mean that it has to only be
8 four times a year. Certainly, as things come up,
9 we can make whatever meetings happen that you would
10 be interested in having. Just in general, it is
11 most likely going to be quarterly. And Ben, do you
12 have any advice as to what extra work being chair
13 on this committee would be?

14 MR. SEDROWSKI: Just the general things for
15 setting the agenda. So any agenda items that would
16 be requested by the trustees or from anyone that
17 kind of comes through RSD to request information
18 from the commission would be CC'd to them. So they
19 would work hand in hand with you in our office in
20 regards to getting the agendas up and running.
21 That would also come into play with the minutes and
22 any memoranda that's going to be coming from this
23 committee and going out to either the commission or
24 the other committees. I will say that going
25 forward, especially with the implementation and the

1 changes that we're expecting, we are planning on
2 having benefits work very closely hand in hand with
3 the other committees, especially legal and
4 personnel, when it comes to rehire rules, so on and
5 so forth, and implementation of those regulations.
6 So to that point, I would likely think that the
7 committee chair and vice chair would be more
8 involved in that to a certain extent if need be.
9 And then overall, just normal duties of anybody
10 that's chairing or vice chairing of a board to the
11 point of overseeing the meetings themselves and
12 making the motions or calling the motions and so on
13 and so forth.

14 MR. FRED: Ben, this is Mike here in North
15 Haven.

16 MR. SEDROWSKI: Yes, sir.

17 MR. FRED: So if I can just ask a couple
18 questions here. So in terms of the benefits, can
19 you just kind of outline exactly what the benefits,
20 in your view, would need to be discussed? Is it
21 health insurance? Is it dental? Can you share
22 that with us?

23 MR. SEDROWSKI: So no, it's regarding the
24 actual benefit calculations, payment structure
25 related directly to the MERS plan. So looking to

1 the Governance Manual, particularly under
2 responsibilities, it talks of reviewing and
3 recommending policies related to the programs and
4 administration that does include, say, eligibility
5 requirements, service credit rules, plan design
6 changes. So one thing that I could see being
7 within this Committee's purview in the future would
8 be that question of the transfer rules in regards
9 to how rehires work between MERS 1.0 and 2.0 and so
10 on and so forth. So you can think of it from that
11 perspective of anything that's the mechanics of the
12 plan and the interactions of the plan itself and
13 the benefit structure, that would be what this
14 Committee would be truly overseeing and
15 specializing in.

16 MR. FRED: All right. Nothing to do with the
17 investment strategy. That is handled separately
18 then, right? In terms of the portfolio, whether it
19 be stocks or whatever it may be, bonds. That's not
20 the purview of this Committee then.

21 MR. SEDROWSKI: That is correct, John correct
22 me if I'm wrong. There's no interaction with that
23 here.

24 MR. HERRINGTON: Correct. There's very
25 little, other than perhaps for informational

1 purposes only, any role for the Retirement
2 Commission itself to play, that the investments are
3 handled by the Treasurer's Office.

4 MR. FREDA: Yes. I was just with him earlier,
5 actually, because I was up at the Governor's
6 Office, and Eric got a nice shout out, he really
7 did, because of the investment strategies. So
8 things are looking good on that.

9 MS. PIWONSKI: So I would say that the first
10 step would be to go ahead and do an approval of the
11 agenda.

12 MR. ARN: I'll move the agenda.

13 MR. FREDA: I'll second.

14 MR. ARN: So we're going to need a chairman.

15 MS. PIWONSKI: Yes. All in favor?

16

17 (All in favor; none opposed.)

18

19 MS. PIWONSKI: And so it went through
20 unanimously. Oh, actually, David Glidden is here.
21 Hey, David.

22 MR. GLIDDEN: Hey there. Can you hear me?

23 MS. PIWONSKI: Yes.

24 MR. GLIDDEN: I'm sorry I'm late. I didn't
25 expect to be able to join at all, but our hearing

1 ended early. No need to catch me up. I'll just
2 tag along here.

3 MS. PIWONSKI: You came in at the perfect
4 time. What's going on right now is we're going to
5 go and pick a Committee chair and vice chair. Do
6 we have any volunteers?

7 MR. FRED: Can I offer some insight here?
8 I'd be willing to consider, I would be willing to
9 be considered for one of the two. I do have a lot
10 of experience. I was chairman of the Connecticut
11 Conference of Municipalities Finance and Audit
12 Committee. But I'm also kind of overwhelmed with
13 all these committees and commissions that I sit on,
14 in addition to being the chief elected official
15 here in North Haven. We've mentioned it's four
16 times a year at most, right? In terms of the
17 minutes, who would be doing, who would be
18 collecting and publishing the minutes?

19 MS. PIWONSKI: So that would actually be on
20 me. That would not be on the Chair.

21 MR. FRED: So is it safe to say that the most
22 significant role would be to help organize the
23 agenda, let's say with Ben or John, and then just
24 go through the motions in the seconds and call for
25 the votes? Is that the majority of you see it that

1 way?

2 MS. PIWONSKI: Absolutely. Yes, that's what I
3 see.

4 MR. FREDA: Okay. All right. I'm willing to
5 be considered for either one of the two.

6 MR. RACCUIA: I'll nominate Mike for sure.

7 MR. ARN: Second.

8 MS. PIWONSKI: All in favor?

9

10 (All in favor; none opposed.)

11

12 MR. RACCUIA: Sorry, Mike.

13 MR. FREDA: That's all right, Troy. I know
14 you were looking at me, so anyway.

15 MS. PIWONSKI: So it's gone through
16 unanimously, and we have our Chair. Now we need a
17 vice chair. And so this role, you would step in,
18 especially in a meeting where Mike was not
19 available.

20 MS. BOYLES: I'm willing, Jeff, if you're
21 willing?

22 MR. ARN: I nominate Michelle.

23 MS. BOYLES: Then caveats, I think you guys
24 probably will not be surprised by this statement.
25 I am anticipating having strong opinions on certain

1 things, and I wouldn't want to unintentionally
2 influence people more by being a vice chair and
3 having strong opinions as well. So that's my
4 caveat with volunteering. Please don't then let my
5 opinion be the opinion either.

6 MR. FRED: I'll second Michelle's nomination.

7 MS. PIWONSKI: All in favor?

8
9 (All in favor; none opposed.)

10
11 MS. PIWONSKI: And unanimously went through.
12 Congrats. We have our Chair and our Vice Chair.

13 MS. BOYLES: Now you're in charge, Mike.

14 MR. FRED: All right. I just got back from
15 Hartford, ladies and gentlemen. So do we have the
16 agenda that you can share? Screen share?

17 MS. PIWONSKI: I do.

18 MR. FRED: Okay. Thank you very much. A
19 couple of parts here are repetitive, but we're
20 going to call this meeting to order, and officially
21 after we have a Chair and Vice Chair here that
22 we've selected. It's 2:14 right now. As far as
23 the attendance roll call, we just did that. We've
24 talked about the approval of the agenda. Let me
25 just make it official. Do I have a motion to

1 accept the agenda?

2 MR. RACCUIA: I'll make a motion to accept the
3 agenda.

4 MR. FREDA: Is there a second?

5 MR. GLIDDEN: Second.

6 MR. FREDA: All right. Any other discussion?
7 Hearing none, we'll call for that vote. All those
8 in favor?

9
10 (All in favor; none opposed.)

11
12 MR. FREDA: Item number two, new business:
13 confirm the committee chair and vice chair, which
14 we have just done, so thank you for facilitating
15 that. We'll go to 2B, review of committee scope
16 and duties, which we have kind of touched on here.
17 Are there any other questions from any other
18 commission members here or the trustees as to
19 anything more that you'd like to discuss about the
20 work plan? I'm sorry, the scope and the duties.

21 MS. PIWONSKI: Would you like me to pull up
22 what we have on that in our SharePoint? Would that
23 be helpful?

24 MR. FREDA: Yeah, please. Thank you. This is
25 perfect. Perhaps we can just take a minute to

1 review these eight points here under item number
2 five, responsibilities. All right, if I could
3 comment here, hopefully everybody had a chance to
4 review the eight. A lot of this, I think, is
5 standard for many of us who've done this. I would
6 look to, let's say here, item number six: monitor
7 compliance with applicable federal and state
8 regulations governing retirement benefits.

9 So the way I see this, ladies and gentlemen,
10 is that we would really need some guidance on this
11 because a lot of us may not be totally familiar
12 with some of the federal and state regulations
13 regarding retirement benefits. So I think that
14 John and Ben--I'm just going to talk to the rest of
15 the members here--they'd be great assets for us in
16 some of this, should we have any questions, and
17 that's how I see it. John and Ben, are we okay
18 with that, you, as a collaborative basis on some of
19 these?

20 MR. HERRINGTON: Yeah, absolutely. I think
21 what our hope would be, as we are working through
22 issues, that we would prepare for the meeting by
23 circulating to you memos that address the issues
24 that are going to be presented, and within those
25 memos, we would identify any relevant provisions

1 and provide some analysis depending on how far we
2 get. I mean, I think that there are lots of legal
3 issues that we can work through. To the extent
4 that we're dealing with particular tax issues,
5 sometimes that requires some special legal advice.
6 We would identify those, and we would work to come
7 up with an option for us to seek tax advice when
8 necessary.

9 MR. FRED: In terms of item number seven,
10 engaging external auditors, consultants, and
11 auditors to support its work within the budget
12 approved by the board. So we do this in the town
13 of North Haven, where we may have some outside
14 people come in. Like, I oversee the pension system
15 here with the investment strategies, but we have
16 outside consultants that work with me on this. So
17 on item number seven, Ben and John, is there a list
18 of consultants and auditors that, through both of
19 you, we can call on? How would that portion work
20 here?

21 MR. HERRINGTON: Yeah. So we have existing
22 relationships. The consultants that we typically
23 would work with would be: we have an investments
24 consultant on the DC side for the plans that we
25 administer on the state side, the defined

1 contribution plans. They could serve as an advisor
2 when we deal with issues relating to the DC
3 component of MERS 2.0. We have our actuaries, who
4 you are familiar with. We also have an outside
5 auditing firm that works with us when we're doing
6 our GASB work. They will provide a report to the
7 full commission, likely sometime in the August
8 timeframe. To the extent that we have special
9 issues and/or questions that relate to the
10 accounting of some of the underlying data that we
11 receive from towns, they would be resources, and
12 those are all existing relationships that we can
13 rely on now without much difficulty. To the extent
14 that through our work we find that there's a need
15 for a different set of experts and/or consultants,
16 we would have to engage with those. But I do
17 believe that range. We also have litigation
18 counsel as well that we can engage on short order.
19 The others we would have to establish relationships
20 and/or engagements.

21 MR. FREDA: Okay, I just have one last
22 question before we open it up to the rest of the
23 committee members. If we look at item number one
24 and we look at, review and recommend policies
25 related to benefit programs and administration,

1 including eligibility requirements and service
2 credit rules. I was going to stop there before I
3 talk about plan design. It would seem to me,
4 correct me if I'm wrong, that the first sentence,
5 minus plan design changes, those rules, let's say,
6 or protocols, are already in place, so would we
7 need to be involved with that? Yes. Go ahead.

8 MS. PIWONSKI: We actually have a really good
9 example today of a policy that we want you to take
10 a look at and figure out what makes sense for this
11 plan because there was a change in the actuarial
12 assumptions. I see, and that change triggered
13 things down the line, that we need a new policy on
14 how we're going to treat this new situation that
15 had not come up before. And so this number one
16 will actually be utilized today, so you'll be able
17 to have a really good example of that today.

18 MR. FRED: So I held back the question on
19 plan design changes. Is that plan design changes?
20 Just what you mentioned here. Is that inclusive of
21 plan design changes, or is that something
22 different?

23 MS. PIWONSKI: My thought on that would be,
24 with MERS 2.0, that was very much a plan design
25 change. If there is a MERS 3.0 in the future, then

1 this group would be extremely close in developing
2 what that might look like.

3 MR. FREDA: Well, that's a perfect answer.
4 Thank you, because I've been reading number one, I
5 was trying to determine the distinction between
6 everything that's mentioned in sentence one, except
7 plan design changes. So I think you've captured
8 the essence of what that would be if it was, let's
9 say, MERS 3.

10 MR. HERRINGTON: I would say something that's
11 a little bit different. And I think that this
12 might be a slight gray area would be with respect
13 to where we are with the DROP plan. So we have a
14 DROP plan, and the DROP plan confers broad
15 discretion to this commission to adopt a DROP plan.
16 We have a DROP plan now that has a plan document
17 that establishes baseline rules for that DROP. We
18 actually are processing for the first time, someone
19 exiting the DROP. But this is a brand new program
20 for us. So as we go through that, we do have an
21 initial set of rules that apply. But through the
22 experience, through the DROP, there may need to be
23 some changes to the rules to govern that DROP plan
24 in the beginning of any of that discussion or
25 consideration would be with this subcommittee.

1 MR. FRED A: Okay. Are there any other
2 questions? Many other committee members. All
3 right, one last overarching comment. Is that any
4 recommendations that we come up with, the process
5 of presenting the recommendations back to the
6 members within CMERS. Does that process look like
7 John and Ben.

8 MR. SEDROWSKI: Apologies. Could you repeat
9 that, sir?

10 MR. FRED A: So once we continue to move
11 forward here, and let's say that we have
12 recommendations that don't include, like, MERS 3 as
13 an example on a plan design, but other
14 recommendations like we're going to discuss today,
15 if we come to a conclusion, how does that get
16 presented back to the members? Like, let's say,
17 Troy's group here. Okay, what's the process on
18 that?

19 MR. SEDROWSKI: I don't have a clear answer
20 for, actually, the recommendations that were coming
21 from this committee traditionally, and as the
22 governance manual structures it, essentially this
23 committee reviews it as specialists and makes those
24 recommendations to the Board themselves, and then
25 the Board themselves, and then the Board at large

1 is who then approves or denies and actually
2 effectuates that change. To that end, I would say
3 any communications to, say, each trustee's
4 individual constituency and so on and so forth,
5 that would flow through the communication policies
6 and communication structure of the Board at large
7 in regards to items that are before the Board that
8 the full Board hasn't considered in that
9 recommendation or towards that end. I'm hesitant
10 to say, to have some kind of clear distinction in
11 communication in regards to those without a formal
12 communication policy that addresses that, and
13 that's something that the Governance Committee is
14 actually going to be addressing within this quarter
15 as well, so that would probably have a better
16 answer shortly and soon.

17 MR. FREDA: Okay. Very good. Anything else,
18 ladies and gentlemen? All right, I think we can
19 move to the next item then. All right. Yeah,
20 we're on 2C, establish committee work plan and
21 schedule. So perhaps we can get some guidance to
22 the committee members as to a framework of that,
23 and then how we can kind of fill out the framework.
24 Can I ask that what would the framework of that
25 look like?

1 MS. PIWONSKI: So currently, as I mentioned,
2 we were thinking this would be four times a year,
3 and we actually have dates that I had sent out for
4 your schedules. Here they are. I need to change
5 the time on this one, but these were the four that
6 we came up with. We do not have to stick with
7 these at all, and especially the times if there are
8 dates and times that are better for you, then we
9 can make whatever happen.

10 MR. FRED: So, here, the next one is May. It
11 would seem to me that there's enough lead time here
12 that we can ask for a motion to adopt these dates,
13 and then if we have to make a change, like in
14 midstream, if people can't make it, let's say, or
15 we run the risk of not having a quorum, maybe we
16 can pivot quickly on that. So if everyone's okay
17 with that, I'd ask for a motion to accept these
18 benefit committee meeting dates.

19 MR. ARN: So moved.

20 MR. FRED: Is there a second?

21 MS. BOYLES: Second.

22 MR. FRED: Oh, thanks, Michelle. Thank you.
23 Or any other discussion. All right, we'll call for
24 the vote.
25

1 (All in favor; none opposed.)

2

3 MR. FRED: Thank you very much. Good job on
4 laying the dates out. And a good job at spacing
5 them out for enough lead time for all of us, so
6 appreciate it very much.

7 MS. PIWONSKI: And let me know if you didn't
8 receive invitations for these dates. All four
9 should have been sent, I believe, the same day.

10 MR. FRED: Thank you. Item 2D, CEMERS
11 Administrative Factor Policy. Would anyone like to
12 comment and offer some guidance on that.

13 MS. PIWONSKI: Yes. If it's okay, I would
14 like to go through and give you a little bit of a
15 heads up as to why we have, and for some reason, I
16 apologize, stop sharing while I look for the right
17 agenda.

18 MS. BOYLES: And while you're pulling that up,
19 maybe, John, if you have any comments on, is it in
20 the statutes that specifies that early retirement
21 and conversion factors will be determined using the
22 actuarial valuation assumptions, or is that just
23 past precedent?

24 MR. HERRINGTON: Yeah, I'll confirm that. I
25 believe that there's a broad grant of discretion to

1 the actuary to establish relevant factors, and I
2 don't believe that it's specific. I believe that
3 it's broad and confers broad enough discretion that
4 this would fall under that, but I can confirm that.

5 MS. BOYLES: We'll get into it with the
6 recommendations, but I was actually surprised to
7 see that these factors are based on the actuarial
8 valuation assumptions.

9 MS. PIWONSKI: So with the change, with the
10 assumptions, the factors were changed to now divide
11 up the population between those that are safety and
12 non-safety, and so there are different early
13 retirement factors and different optional form
14 factors, depending on which group this person or
15 this member had been a part of.

16 MS. BOYLES: And, Megan, are these sex
17 distinct or unisex?

18 MS. PIWONSKI: Unisex.

19 MS. BOYLES: Okay, so we have at least done
20 that conversion.

21 MS. PIWONSKI: Right. And so the issue that
22 we're having on an administrative side is when
23 someone has a career that includes both safety and
24 non safety time. We want to know what would make
25 sense for the optional forms and the early

1 retirement factors at that point. And so far, the
2 only two that have come up were police officers
3 who, right at the end of their career, went to a
4 school and they were safety officers. So that was
5 fairly easy for us to consider them still safety
6 employees. But there were a lot of things as we
7 were thinking through this. The reason that safety
8 employees have different tables is because they are
9 expected to die faster. They are more likely to be
10 exposed to things that would be harmful to them.
11 They may, during their time, there could be things
12 that would factor into their health. So what we're
13 trying to do is figure out, does it make sense to
14 treat all employees the same so we're consistent
15 across the board. And we just need to know, would
16 it make sense to have it be the last place that
17 they worked or the longest job during their career.
18 Or just the fact that they were safety employee at
19 all, does that mean that they should be on a safety
20 table because they were possibly exposed to things.
21 So this is something that we thought would make
22 sense for you guys to get involved in.

23 We had the actuaries put together this quick
24 little two page piece that I had sent earlier. And
25 so they made a recommendation that the primary

1 occupation be adopted. So depending on where
2 someone worked for the majority of their time, then
3 we would use those factors. So if someone was a
4 police officer for two years and then went to the
5 library for the rest of their career, they would
6 not be treated as a safety employee because the
7 majority of their career was at the library at that
8 point.

9 MR. FRED: Thank you all for. I'm sorry. Go
10 right ahead. Go ahead, Michelle.

11 MS. BOYLES: Just more follow up questions on
12 what's currently being done. So these are being
13 used to convert from a single life annuity to joint
14 survivor as well?

15 MS. PIWONSKI: Yes.

16 MS. BOYLES: What are we assuming for the
17 beneficiary? Mortality for public safety? Are we
18 assuming safety or non-safety?

19 MS. PIWONSKI: Good question.

20 MR. FRED: To follow up on that -- go ahead,
21 I'm sorry.

22 MS. PIWONSKI: We have tables from them. I'd
23 have to dig in further, Michelle.

24 MS. BOYLES: Okay. Because I think that is a
25 little bit telling on what our past precedent has

1 been, and I think we should know what we're doing.
2 But I think. It's clear from what I'm seeing so
3 far. I would prefer to not do separate safety
4 versus non-safety because I think we're splitting a
5 lot of hairs here. And yes, we are being more
6 generous to public safety if we say, okay, yes,
7 they're likely not to live as longer. So if they
8 take an early retirement, then the early retirement
9 reduction is likely not as high, the reduction
10 isn't as high, so they get slightly higher benefit
11 because we're reflecting, they probably won't live
12 as long. But the flip side is then we're
13 penalizing them if they elect spousal coverage
14 because if we're assuming they die sooner and their
15 survivor lives longer, then it's going to be a
16 bigger benefit reduction for them to cover their
17 spouse, and I don't like that. I'm trying to be
18 that actuary who's presenting -- this is why I
19 don't like it, guys. Because I think we're being
20 favorable in some ways and not in others. And it
21 leads to these complicated questions. And if we
22 had a more flat, consistent assumption, then we
23 wouldn't have this issue.

24 MR. FRED A: So, if I can add on to this, it is
25 kind of ambiguous in our arcane in many respects.

1 So let me present a hypothetical situation. A
2 police officer retires, less than his time that he
3 needs for a full pension calculation, but decides
4 to retire to go into a school resource program.
5 Let's say the elementary schools. And let's say,
6 because it would happen this way, he would be, or
7 he or she would be, working every month except July
8 and August. Would that individual qualify to get
9 ramped up to a full pension, and would that be
10 considered safety as a school resource officer?

11 MR. HERRINGTON: So it's possible, both
12 situations are possible at the member's election.
13 Right. So there is a re-employment provision that
14 used to prevent that. It used to prevent across
15 the board any MERS retiree from working in any MERS
16 town, period. There was an exception that applies
17 to those that are school resource officers. So
18 someone that retires from MERS goes to work for
19 Board of Education, that is a MERS participating
20 entity, that individual would have the option of
21 collecting the full pension and collecting the full
22 salary during that time period, at which time there
23 would be no adjustment to their pension. They
24 would just have two sources of income. Or they can
25 elect to no longer collect their pension and to

1 participate in the retirement plan. And in that
2 case, their future benefit would account for their
3 time as a resource officer.

4 MR. FRED: Okay. Any other questions here
5 from the members? We'll go back to the agenda.

6 MS. PIWONSKI: Sorry, one second.

7 MR. FRED: Megan, is there a recommendation
8 to us? Because you mentioned earlier when I
9 referenced point number one on the
10 responsibilities. Is there anything that you'd
11 like to present to us that we should engage in a
12 discussion right now?

13 MS. PIWONSKI: For the Administrator
14 Administrative Factor Policy, if you had read
15 through and you agreed with the actual opinions,
16 and you wanted to move forward, and have that go to
17 the commission. Then we could have you vote on
18 that would be your recommendation to the committee.
19 Otherwise, if you don't like what the actuaries.
20 Had put out there, I think having a discussion
21 between your group coming up with what you think
22 would be, perhaps the best way to move forward
23 would definitely be helpful. Michelle, I know you
24 had commented that you didn't like the way that it
25 was being done. Would you make a recommendation to

1 the board that it should unify the safety in
2 general again?

3 MS. BOYLES: I think absent a policy argument
4 or historical absence, you guys having something?
5 Oh, yes. This is why it was decided to be used and
6 developed in this way. I think without that we
7 should discuss it and if it's reasonable and
8 practical and if we like it being this way. Part
9 of my concern is when it's linked up to the actual
10 valuation assumptions. External evaluation
11 assumptions change, and so you could literally have
12 -- and they can change at times that are not
13 predictable. And what I mean by that is, yes, the
14 valuation date is July 1, but by the time the
15 valuation is processed accepted, then it's six
16 months after the valuation date. So how are we
17 adopting the timing of these changes? And it's not
18 even mortality tables that change, even though the
19 Society of Actuaries does publish updated
20 improvement scales along the way. Mortality
21 changes if we change the interest rate assumption,
22 that's going to impact these factors. And so tying
23 it to the actual evaluation assumptions takes a lot
24 of control and predictability away. And so that's
25 where those are. My biggest concerns of us doing

1 this on an ongoing basis is seeing how it could be,
2 I think this is just scratching the surface of
3 issues. This is the.

4 MR. HERRINGTON: Some history. Typically, we
5 have timed all of these things to occur based on
6 that valuation kind of schedule. So it's usually
7 not just the valuation schedule. There have been
8 some instances that between experienced studies,
9 that we have changed the assumptions, but most
10 often the changes have coincided with the results
11 of an experienced study. And at that point we
12 would change the assumptions, and the assumptions
13 typically are changed to apply to the next
14 valuation. So that's historically how we have done
15 these changes. And the largest changes have been
16 the underlying option factors. We did that in
17 connection with experience study. So we typically
18 haven't changed the assumptions midstream outside
19 of that valuation schedule. So whether that's the
20 preferred practice or not, but we have been able to
21 time the changes, apply and announce the changes,
22 all on that kind of schedule. But largely that
23 would mean that the default is that all of this is
24 going to occur every five years. I mean, barring
25 some large.

1 MR. SEDROWSKI: It looks like we have a
2 question. Another question. Is that you Dave.

3 MR. FRED: That's David? Yes.

4 MR. GLIDDEN: Yes. I didn't even realize I
5 had a question. But since you asked, I guess I
6 must have raised my hand before I was following up
7 Michelle's initial comment. I was looking at the
8 original recommendation. Did I understand you
9 right, Michelle, that the recommendation to use the
10 primary occupation as the factor was something that
11 you are not comfortable with or you are taking it
12 to another level on the question of actuarial
13 assessment in the first --

14 MS. BOYLES: I kind of took a left turn
15 instead of the question that's presented is how
16 should we use different factors for the two groups
17 if somebody has two benefits? And I said, why are
18 we using two different factors for the different
19 pieces. That was where I made things complicated.
20 I was like - why are we doing this?

21 MR. GLIDDEN: Gotcha. I mean, my thinking on
22 the recommendation, admittedly, is just scratching
23 the surface, but my first blush reaction was that I
24 liked the split better because. To me, it didn't
25 have variability in it. It was actually

1 reflecting. The amount of time that a hypothetical
2 person was in this type of position versus that
3 type of position. And that having it as the
4 primary one, you could have all different types of
5 examples of which one would be the primary job
6 classification. So you could have dramatically
7 different impacts on people. And I just like --
8 the purity of it reflecting people's actual service
9 in the various classifications that they've served.
10 And that's, again, just my first blush reaction.
11 To the recommendation and where I would prefer to
12 go.

13 MR. FREDA: All right, so here's the question
14 to the committee members. Do we want to vote on
15 this now, or do we need time to kind of digest this
16 a little bit more? I'll turn to our Vice Chair,
17 and we can put you on the spot, Michelle, because I
18 know that you have --

19 MS. BOYLES: I have opinions. I did say that.

20 MR. FREDA: Yes, you did.

21 MS. BOYLES: Yes. I've warned everyone that I
22 had opinions. I think it merits further
23 discussion. I think we do at least need the answer
24 to what is being assumed for the beneficiary
25 mortality, just because I think that's important

1 for our information, just to know how these are
2 being determined. But I think it merits further.
3 Research and discussion to know what's going on.
4 What's going on? And we could even ask the
5 actuaries of -- did they present this as the answer
6 because this is what they were asked? Or is this
7 because they think it is best practice to link to
8 the valuation assumptions?

9 MR. FRED: All right. We're saying that for
10 a moment, in terms of looking at Michelle's point
11 of view, what would be the time frame, Ben and John
12 and Megan, that you would want to have us make this
13 decision either way?

14 MS. PIWONSKI: So that's a good question right
15 now. As I mentioned, we have not had problems come
16 up. We've had, I believe it was two, and they were
17 very simple, really very obvious, the police
18 officers just right at the end, going to the
19 schools and being safety officers. So those were
20 the only two that had come up so far. At any
21 point, we could have something trigger kind of a
22 more immediate need, but we don't have that right
23 now, not until someone actually goes to retire that
24 is in that position.

25 MR. FRED: Okay. So I'm assuming we don't

1 want to stretch this out to our next meeting in
2 May. Is there a time frame that the committee here
3 can review it and come to a conclusion?

4 MS. BOYLES: Is it maybe something, because we
5 are due for an experience study, right, remembering
6 correctly? We're doing an experience study, John,
7 or did I make that up?

8 MR. HERRINGTON: I believe it's with next
9 year's valuation.

10 MS. BOYLES: Because maybe we can find
11 agreement on this question, and then the answer to
12 my question is more, let's discuss that as part of
13 the experience study, and for now, we follow past
14 practice.

15 MR. FREDA: That's a very good thought. Let
16 me offer this, and I like these different points of
17 view that we're presenting to each other. So it's
18 my experience with actuaries that they give us, at
19 least a local government, factual information. And
20 we're going through something now, just to digress
21 for a second, where one of our groups was debating
22 the fact that the actual actuaries said that the
23 annual required contribution was too high, but it
24 was accurate. So I always thought that when we
25 have an actuarial analysis, that offers us some

1 cover, that we're making the best decision based on
2 the actuaries. But Michelle makes a good point.
3 Is it something that is that accurate, or is it
4 something that the actuaries have been asked to do?
5 And with multiple members here, I'm not sure if
6 that comes into play at all.

7 MR. HERRINGTON: I think that it's
8 interesting, and I'm happy that we actually have
9 two actuaries on this call, right? But I mean, the
10 way that I look at it is that what actuaries do is
11 they base a lot of their numbers on assumptions,
12 and there's a wide range of assumptions that may or
13 may not be reasonable, but it is entirely possible
14 for two different actuaries to come up with a
15 different number or a different recommendation on
16 the same facts. And it all comes down to the
17 recommendations that they're relying on.

18 MR. FREDA: So then, do we go back to
19 Michelle's thought about voting for this and then
20 reviewing it again in the experience study. All
21 right, so how about if we do this -- how about if I
22 make a motion to accept the actuarial
23 recommendation, with the caveat of it being
24 reviewed in the experience study. Is there a
25 second on that motion?

1 MS. BOYLES: Okay. I think that David
2 preferred the actuaries' recommendation was to use
3 primary occupation, but I think David preferred
4 split as the conclusion, right?

5 MR. GLIDDEN: I did. I did. But again, that
6 was my first-blush, just-scratching-the-surface
7 reaction to it, is that I'm more comfortable with
8 an approach that reflects the actual periods of
9 service, and if there are multiple classifications,
10 rather than it being having something that has
11 variability built into it.

12 MS. BOYLES: Maybe, Megan and John, can you
13 comment on the administrative difficulties and
14 other issues that might arise if we were to, say,
15 split versus primary?

16 MR. HERRINGTON: Yeah, I think that's hard to
17 tell. I think we could look to see how often and
18 how frequently this comes up. I think there may be
19 a difference one way or the other, but I think that
20 once we have an answer, we can apply that answer
21 kind of consistently for the ones that come up. Do
22 you see that differently, Megan?

23 MS. PIWONSKI: I mean, certainly with--let's
24 take the two, I believe it's two that we've
25 processed so far--hypothetically, let's say the

1 police officer does 25 years as a police officer
2 and then five years at the school as a safety
3 officer. Because they're working in a school, we
4 consider that a general employee at that point
5 rather than a safety employee.

6 Under the split, it would be set where those
7 five years are going to be under general, with that
8 added into the 25 years under the safety.
9 Certainly it's a little bit more administratively
10 difficult with our systems than doing the primary
11 occupation, but certainly feasible.

12 MR. GLIDDEN: I mean, as I was reading the
13 pros and cons, that actually made it sound like the
14 administrative aspect is more difficult for the
15 recommended primary occupation approach because
16 that's listed in the cons, whereas it's not listed
17 in the comments for the split. So I would just
18 point that out.

19 MS. PIWONSKI: The actuaries did think that it
20 was going to be harder with the primary occupation.
21 I don't think that's going to be all that
22 difficult, though. It really would just be how
23 much service was under general versus how much
24 service was under safety, and the comparison at
25 that point.

1 MR. FRED: Well, I see two options here. We
2 can delay the vote and analyze it more, or we can
3 create a motion to go back to David's point on the
4 split.

5 MR. GLIDDEN: Let me just add that I'm trying
6 to think of different examples, right? Like if we
7 had a circumstance where somebody had a relatively
8 equal amount of service in one type of
9 classification versus the other, that's very
10 different than the two examples that apparently
11 we've dealt with, and it would be more
12 consequential in a circumstance like that, and it's
13 a much closer call. So to me, having the split in
14 that circumstance would be a lot fairer, as opposed
15 to just the randomness of which one had two in this
16 versus a week less in that classification. Much
17 easier in the types of situations that we've dealt
18 with, but I want to try to account for the ones
19 that are messier.

20 MR. FRED: All right, let me propose another
21 motion that we make a motion to delay the vote,
22 subject to more scrutinization, and I propose as
23 part of the motion that, one month from today, on
24 May 4th, we have a decision on that and get back to
25 everybody.

1 MR. GLIDDEN: I'll second that.

2 MS. BOYLES: One month from today, on March
3 4th?

4 MR. FRED: Yes, whatever that one month would
5 be.

6 MS. BOYLES: Just making sure.

7 MR. FRED: Yes. And okay, let me just stay
8 with the motion. We have a motion. We have a
9 second. Is there any other discussion on this?
10 Any other points of view?

11 MR. GLIDDEN: The only discussion I would add
12 is what's going to happen in that month that's
13 going to make us be able to more easily make this
14 decision in a month. Are we just going to think
15 about it more, or are we going to get some more
16 info from folks?

17 MR. FRED: Any thoughts on that during
18 discussion?

19 MS. BOYLES: Is it something we're seeing A
20 few numerical examples? That would be helpful.

21 MR. ARN: That would be really helpful,
22 actually.

23 MR. GLIDDEN: Agreed.

24 MS. BOYLES: Megan, is that something that you
25 guys can provide?

1 MS. PIWONSKI: Yes. That should not be a
2 problem.

3 MS. BOYLES: Cool. Maybe find some real
4 people that are like a 90%, a 25%, just so we can
5 see a little bit of the spectrum.

6 MR. FRED: Megan, how long would it take to
7 provide that information in your view?

8 MS. PIWONSKI: Yeah. I was thinking if you
9 want to make a decision in a month, then you'd
10 probably want that within a week, I would say,
11 right?

12 MR. FRED: And if we decide to pass this
13 motion -- I know we're still in discussion -- you'd
14 be able to send out Megan or Ben another agenda
15 just to do it formally. That way we have to post
16 the meeting, right? We would do that?

17 MR. SEDROWSKI: If you are going to be making
18 a formal recommendation, yes, we would have to do
19 that. So we'll have to post notice so we can get
20 that up on the website as soon as today, or as soon
21 as tomorrow. Stay corrected. If we agree to that,
22 then the agenda would come out ahead of time just
23 as it is and needs to be posted 24 hours out.

24 MR. FRED: Now on March 4, we have an Audit
25 and Finance Committee meeting. Does anyone here on

1 that also?

2 MS. BOYLES: I am.

3 MR. FRED: So Michelle and I are on that
4 also, but that's not a quorum.

5 MS. BOYLES: Is this something, since it's
6 follow up, would we be permitted to do it via email
7 vote or no?

8 MR. FRED: I think that that's possible. We
9 still have to notice it because it still ends up
10 being public meeting, correct? I would propose
11 this. We're still in discussion that if Megan can
12 produce this in a week, we still stay with March
13 4th. Two of us are going to be on the other
14 committee at 1:00. And perhaps we set this up at
15 10:00 that day, March 4th.

16 MS. PIWONSKI: I believe -- Michelle, did you
17 have something that day?

18 MS. BOYLES: Yeah. I'm going to check my
19 calendar. I don't remember the time.

20 MR. FRED: The options that day could be
21 10:00, 11:00, or even noontime leading up to the
22 1:00 meeting for Michelle and I.

23 MS. BOYLES: I can do 11 or noon. I cannot do
24 10.

25 MR. FRED: David and Troy, how do you see

1 that?

2 MR. GLIDDEN: Right now, 11 and noon work for
3 me.

4 MR. RACCUIA: Either one works for me too,

5 MR. FREDA: Okay, so I'll reframe the motion.
6 I'd like to ask for a motion to withdraw my
7 original motion because we're in discussions. Is
8 there a second on that?

9
10 (All in favor; none opposed.)

11
12 MR. FREDA: So I'd like to make a motion that
13 Michelle will provide the information in
14 approximately a week and that this committee will
15 meet again on Wednesday, March 4th at 11:00 a.m.

16 MR. RACCUIA: I got a friendly amendment that
17 Megan will provide the go ahead, Troy.

18 MS. PIWONSKI: Oh, I thought that was great.

19 MS. BOYLES: No, no, no.

20 MR. FREDA: Is there a second on that motion?

21 MS. BOYLES: Second with the friendly
22 amendment.

23 MR. FREDA: Okay? Any other discussion on
24 that amendment for that motion? I will call for
25 that vote. All those in favor?

1 (All in favor; none opposed.)

2

3 MR. FRED A: In terms of the date, March 4th,
4 11:00 -- and maybe, Ben, you can just confirm that
5 back to everyone also, if you don't mind.

6 MR. SEDROWSKI: March 4th at 11:00.

7 MR. FRED A: Yes, we'll go to the next item.
8 Sorry. Want to pull that agenda up again? Yes, I
9 apologize. Still on new business, Item 2E
10 Reemployment rules. Did we cover some of that?

11 MS. PIWONSKI: So this would be different.
12 This is going to be under, from MERS 1.0 to 2.0.
13 And so I would like to give a little bit of a
14 background as to what we do right now under current
15 MERS, and then have a discussion, just a discussion
16 about what it might look like with MERS 2.0. The
17 point today is not for you to get to any decisions
18 that need to be voted on. This is more just so
19 that you can really start having a good discussion
20 and kind of feel your way around what needs to
21 happen with this.

22 And so currently, with the rehires, members
23 moving from one municipality to another, but
24 staying within the same formula, they would be
25 going, whether it was not covered by Social

1 Security or covered by Social Security, it's
2 completely seamless for them. All of the service
3 is used within the formula. The highest three
4 years of compensation are used from all employment.
5 And so there would be nothing that the member would
6 see at all in a difference.

7 When a member moves between municipalities
8 that are in a different formula, so they could be
9 going from a non-coverage position where they were
10 getting the 2% formula to a Social Security-covered
11 position that drops down to a one and a half
12 percent formula at age 62. When we go and
13 calculate this benefit for them, all of the Part A
14 service is used in the formula for Part A, and all
15 of the Part B service that they did is used under
16 Part B. But we actually use the high three years
17 of compensation for both formulas. So although
18 they're no longer working in that first job, that
19 benefit under the first job continues to increase
20 as compensation increases. So we're not freezing
21 it and keeping it small. It does continue to grow.
22 And that's an important thing to note.

23 They also are going to be contributing under
24 the new formula. So if they went from a higher
25 contribution because they were getting the 2%

1 formula under A, and now they're going to be under
2 B, which is a lower contribution rate, the
3 contribution that they're paying out of their
4 paycheck switches completely from A to B with this
5 new job, even though their Part A benefit continues
6 to increase slightly with additional compensation.

7 For members that leave, and they take a return
8 of their employee contributions from their initial
9 period of service, this is only allowed if someone
10 is not vested. Once they're vested, the money does
11 have to stay. But if they're not vested, they can
12 take those monies out of the plan. And so service
13 and salaries are no longer used from that period.
14 It's almost like it never existed, unless the
15 member pays back those contributions.

16 For members that leave, and they commence
17 benefits, but then they are rehired under MERS full
18 time, their benefits are suspended. They actually
19 lose the COLAs that they had earned. And they
20 start accruing new service and new compensation is
21 able to be used for those high three years. If
22 they do join part time, they don't have to worry
23 about it. They can continue as they were. But if
24 they are full time, benefits are suspended.

1 And then, after that, just kind of a quick
2 recap of what it is that is happening right now, I
3 wanted to kind of throw out some scenarios for MERS
4 2.0 rehire policies. So if we have members that
5 are leaving their MERS position and they're joining
6 a MERS position in another town or location, what
7 this means is they would be going from a 1.0
8 benefit that they've been accruing, and now they're
9 joining a MERS town, and we need to know, are they
10 going to be grandfathered into that original MERS
11 benefit, or do they get switched over to MERS 2.0?
12 If they're grandfathered, would the new town be
13 responsible for paying the old MERS contributions,
14 even though they really had joined in under MERS
15 2.0? So the rest of their employees are going to
16 be under 2.0.

17 If they're not grandfathered, will their
18 original MERS benefit be frozen and added to the
19 new benefit, or does that original benefit continue
20 to increase with new salaries under this new
21 position? If their benefit is frozen, are they
22 able to commence their prior 1.0 benefit prior to
23 commencing their 2.0 benefit? So a lot of things
24 to think about there.

25 And then we also have an added issue for those

1 that had retired under MERS, and now they're
2 joining a town that has MERS 2.0. Are they
3 required to join MERS 2.0, or can they opt out?
4 And do they have to suspend their benefits while
5 working under the new position? We have towns that
6 are talking to me about joining MERS 2.0. Some of
7 them have police officers that have a MERS pension
8 that they're actually collecting on currently. And
9 so this is something that really is going to be
10 immediately thought about in these communities.

11 And for those that are in MERS 2.0 or, sorry,
12 who had MERS 1.0, but they had not yet gotten their
13 25 years to satisfy the normal retirement, would
14 their service under 2.0 count towards those 25
15 years so that they can retire earlier? So these
16 were just questions that I wanted to kind of throw
17 out there, pose to you so that you have an idea of
18 where the conversation kind of needs to go. In
19 that way, any rules that get set up can, you can
20 start thinking about the implications behind those.

21 MR. HERRINGTON: I just wanted to kind of set
22 the stage a little bit, right? So what's clear is
23 that if we do nothing, if this committee has no
24 recommendation, there's no additional rule passed
25 by the Commission, what the default would be is

1 that every individual that's hired at some point in
2 the future for existing towns anytime beyond July
3 1st of 2026, that individual would go into MERS
4 2.0. So we would have to deal with essentially a
5 split plan between the two.

6 If we want to refine those outcomes, we would
7 have to do so with a rule along these lines. And
8 so I think that we've had a brief discussion with
9 the Commission along these lines. I think that
10 there were, you know, a couple of different
11 viewpoints that were raised. What I wanted to do
12 with this meeting is once again kind of present
13 this issue to this subcommittee and then this
14 committee, and then ask this committee if there's
15 any additional information you would want from us
16 in terms of things that would help you consider
17 what a rule might look like to deviate from the
18 status quo. Or is the thought that, you know, it
19 would be just more helpful for us to come back with
20 a rule, a recommendation and a list of potential
21 consequences or perhaps a couple of different
22 rules? I think that the idea is that we are going
23 to have to establish that rule, and we certainly do
24 not believe that we've done the work required for
25 this committee to make a decision here today, but

1 we would like for the next meeting to be in a
2 position as best we can to make that decision. And
3 I guess the question is, what can or should we do
4 to assist?

5 MR. FRED: Well, John, this is Mike here. I
6 always like the risk-reward scenarios, so if there
7 are some scenarios that can be presented, that
8 would be helpful. I think you very nicely told us
9 here that if we decide to do nothing, it's an
10 automatic kind of default into MERS 2.0. I'm not
11 sure what the unintended consequences are on that
12 other than perhaps a little bit more complexity in
13 the system, but I'll open it up to the committee
14 members. I like the different scenarios, the
15 advantage and the disadvantage, what those
16 unintended consequences are. I'll open it up here.

17 MR. ARN: I would like to get a copy of those
18 questions, please, that you are showing on the
19 screen. I don't think that came in our package.
20 And then I would also like to hear maybe for next
21 time your thoughts and suggestions on where you
22 want to see it. Maybe you can send that in the
23 meantime so that we can try to figure that out and
24 be able to speak to it with some knowledge.

25 MR. FRED: Does everyone agree with Jeff on

1 that? I think that's probably the right course of
2 action.

3 MR. GLIDDEN: I just wanted to echo. You beat
4 me to it, Michael. Nothing helps me more than
5 having hypothetical examples that show how
6 individuals would be tangibly impacted with this
7 approach versus that approach, so to any extent
8 that we're able to put together scenarios or
9 hypotheticals, that would help me anyway.

10 MR. FRED: I know this is a discussion now.
11 There's no vote being taken on it. But John and
12 Ben and Megan, do you see we need a motion for
13 this?

14 MR. SEDROWSKI: No.

15 MR. FRED: Okay, very good so -- yes, go
16 ahead, Megan.

17 MS. PIWONSKI: Can we talk to any attorneys
18 about this too. I'm thinking in particular the
19 question about growing into retirement eligibility.
20 I would assume that's a requirement that they'd be
21 able to grow into the 1.0 retirement eligibility.
22 But have we talked to any attorneys about what
23 components have to be true legally?

24 MR. HERRINGTON: What is the question? Can
25 you rephrase what "growing" is? So we're saying

1 somewhat --

2 MS. BOYLES: So Megan mentioned there could be
3 somebody who terminated, did not complete enough
4 service to be eligible for full retirement at the
5 time they leave under 1.0. Then they go to another
6 community. They're now under 2.0. Does that
7 service count towards retirement eligibility for
8 the 1.0 portion of their benefit? So that was the
9 question I heard Megan say. So my answer back is,
10 but what did the attorney say? And that's just one
11 specific piece that I think the attorneys would
12 have an opinion on. I'm not sure. Attorneys have
13 opinions on lots of things, so there might be other
14 components here where they would say this is not an
15 administrative decision, but this is actual legal
16 requirements. I'm not certain where that line
17 might be drawn.

18 MS. PIWONSKI: And really, these rehire
19 policies will end up being touched by two
20 committees, as you had mentioned, where the
21 Benefits Committee, certainly, but then Legal as
22 well.

23 MR. FRED: All right, so I think what we're
24 agreeing to do is to have this sent out to
25 everyone, to Jeff's point on the questions. And

1 we're looking at a risk-reward analysis on multiple
 2 scenarios. Any other questions on this? All
 3 right, Megan, I'll turn it back to you here. Item
 4 number three, Old Business. Is there any Old
 5 Business that needs to be discussed? Since it's
 6 our inaugural debut, there shouldn't be any Old
 7 Business, right? All right. Seeing no Old
 8 Business, I'd like to thank everybody.
 9 Congratulations, Michelle as Vice Chair. Look
 10 forward to continuing to work on this committee.
 11 And I'd like to ask for a motion to adjourn.

12 MR. GLIDDEN: So moved.

13 MR. RACCUIA: Second.

14 MR. FRED: Any other discussion?

15 MS. PIWONSKI: Can you say names?

16 MR. GLIDDEN: I think it was Troy and Dave,
 17 right?

18 MR. FRED: Troy and Dave. And before we
 19 conclude and call for the vote, Megan and Ben and
 20 John, thank you very much for helping steer us in
 21 the right direction here. We appreciate it.
 22 Perfect. Thank you all. All those in favor of the
 23 adjournment?

24 (All in favor; none opposed.)

25

1 MR. FREDA: Thank you. Have a good afternoon
2 everyone.

REPORTER'S CERTIFICATE

I, Rachel Murphy, the undersigned, do hereby
certify that the foregoing is, to the best of my skill
and ability, a true and accurate transcript of recording
of the meeting for Benefits Committee of the Municipal
Employee's Retirement Commission on February 4, 2026.

A handwritten signature in cursive script, appearing to read "Rachel Murphy", is written over a light gray rectangular background.

RACHEL A. MURPHY - NOTARY PUBLIC

IN AND FOR THE STATE OF CONNECTICUT

MY COMMISSION EXPIRES: APRIL 30, 2029
